# Mobile client

Client runs on end-user mobile device (smartphone), shares personal conference-related information in the SmartRoom space and accesses appropriate services. For the current speaker the client interacts with the Presentation service controlling the presentation and slide show. In parallel, clients of other participants access informational services of this conference.

### Download link

<http://sourceforge.net/projects/smartroom/files/clients/android/>

### Manual installation

1. Set loading from unknown sources option enabled (**Settings** → **Applications** → **Unknown Sources**)
2. Connect your device to PC via USB and transfer **SRClient.apk** file to some directory on your device
3. Install some file manager (ex. Astro). Browse the **SRClient.apk** and click it to start installation

### Installation through Google Market

1. Open Google Play web page (<https://play.google.com/store>) and go to **applications**
  1. Type **SmartRoom Client** to a search field
  2. Choose application from the provided list
  3. Click **install**

### Registration of a participant

The screenshot shows the SRClient app interface for registration. The app title is 'SRClient' with an information icon (i) for the help menu. The main heading is 'Registration service'. Below this are four input fields: 'IP address' (labeled 'Smart Space IP address'), 'Port of SIB' (labeled 'Smart Space port'), 'Login' (labeled 'Your login'), and 'Password' (labeled 'Profile password'). At the bottom, there are two buttons: 'Join Smart Space' (labeled 'Join as registered user') and 'Enter as a guest' (labeled 'Join as a guest'). A dashed line from the text 'Go to registration service' points to the 'Registration service' header.

Go to registration service -----

IP address ----- Smart Space IP address

Smart Space port ----- Port of SIB

Login ----- Your login

Password ----- Profile password

Join as registered user ----- Join Smart Space

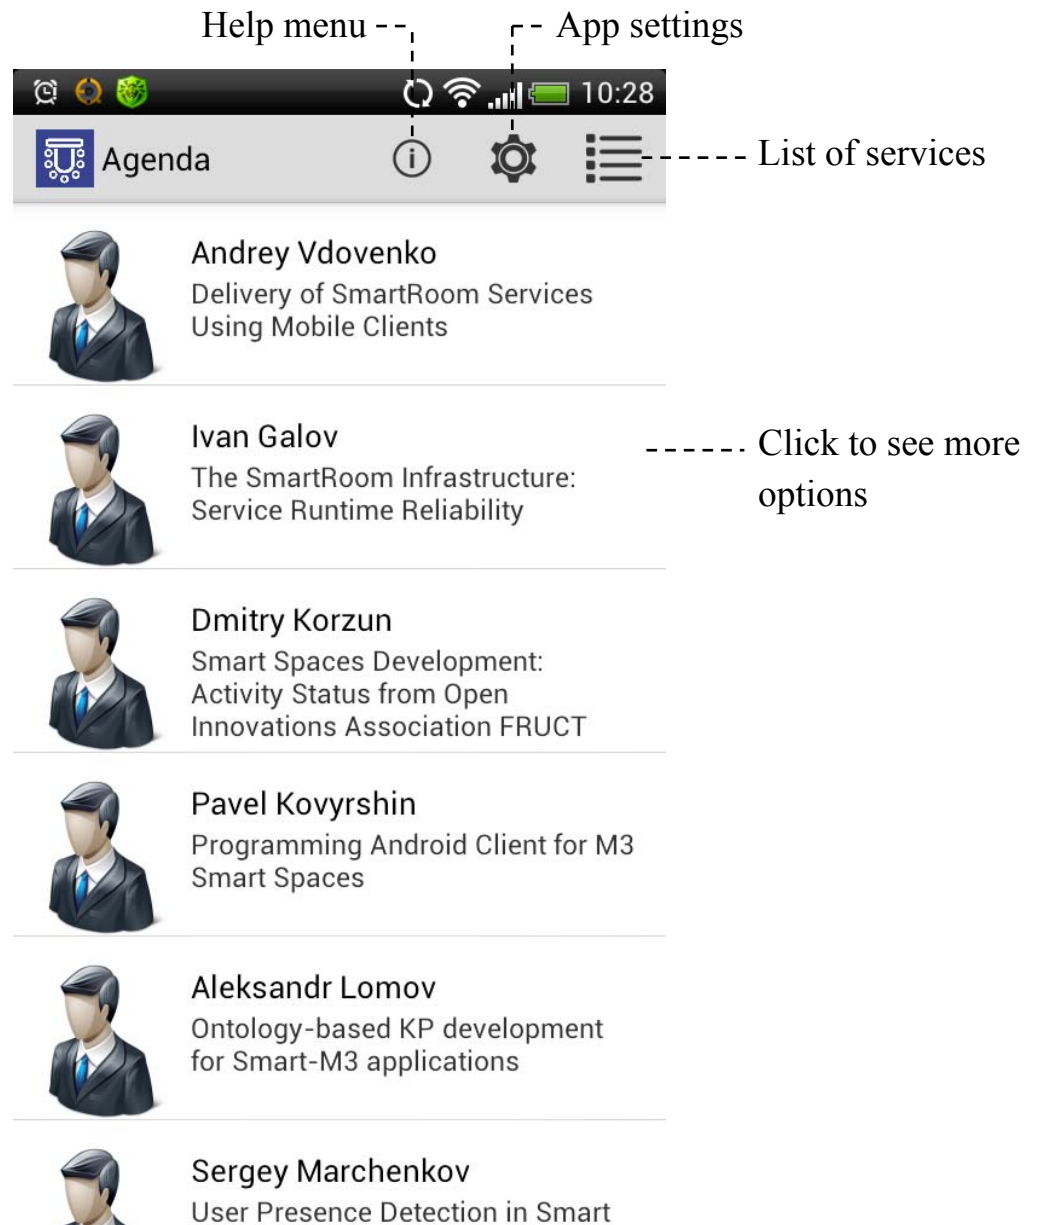

Enter as a guest ----- Join as a guest

SRClient (i) ----- Help menu

Registration service

⇒ Before using mobile client please complete registration at web-registration service.

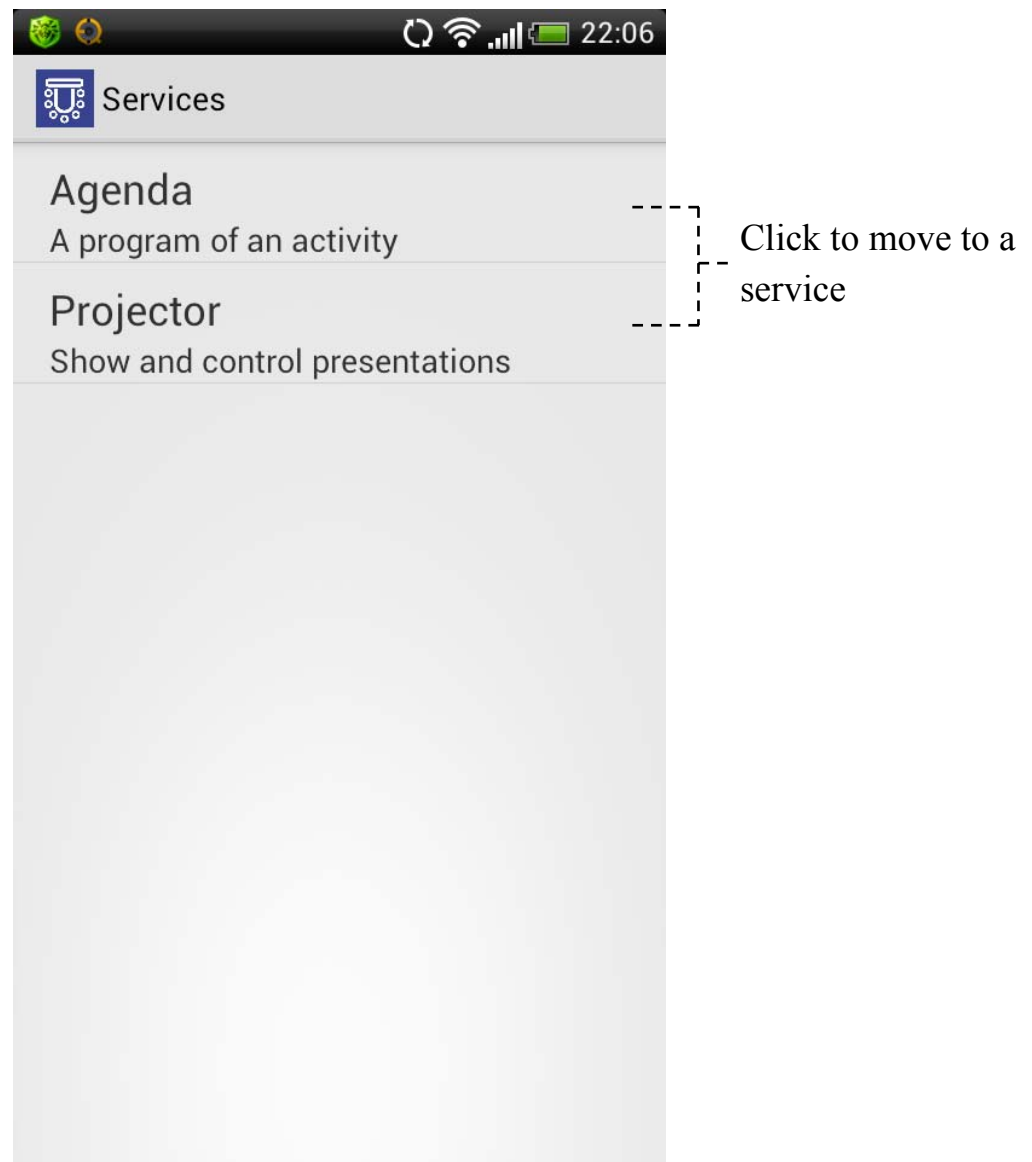

### Agenda of an activity

⇒ Agenda service presents the list of participants registered in Smart Space.

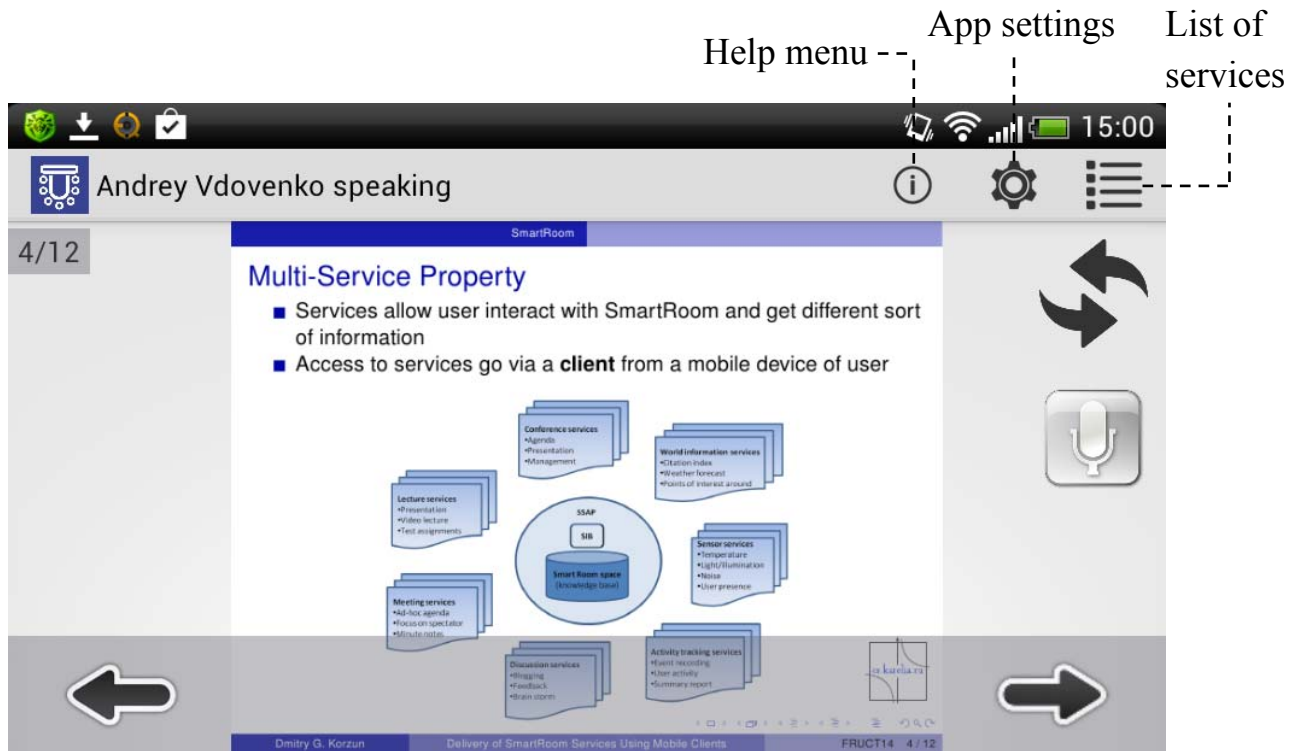

⇒ If participant has an image different from default it means that he is online.

### Available services

⇒ Services window presents list of all available services in Smart Space .

### Control of presentation

### Control buttons

← → - use to switch presentation slides

🎤 🟢🎤 - click to enable or disable microphone

↻ - use to refresh current slide
